## Fitted Empire Frock

A picturesque fitted empire frock in metal brocade means fashion. The ruche about the hem is fascinating.

## Sues the Ex-Kaiser

Here Voss, father of seven children, a workman on the crownland Bornstedt, near Potsdam, who is suing ex-Kaiser Wilhelm for wages due him. He was taken off the pay rolls without being notified because he failed to report for work due to illness.

## "Liquid Air"

Liquid air is prepared by subjecting air to great pressure and then cooling it by its own expansion to a temperature below the boiling point of its constituents.

# WHY

## Circulation in the Ocean Is Influenced

All the creatures man takes from the sea to eat or use, from whales down to shrimps, depend for their life and growth on the behavior of the water, and that in turn depends on such seemingly remote influences as the shining of the sun, the ice of Antarctica, the flow of tropical rivers and the height and length of submerged mountain chains. At the Pasadena meeting of the American Association for the Advancement of Science, Dr. T. Wayland Vaughan, director of the Scripps Institution of Oceanography, outlined the problems confronting scientists in their endeavor to obtain a scientifically and economically useful panoramic view of oceanic life.

The distribution of most of the things needed by plants and animals in the sea depends largely on the circulation of the water bringing new supplies of mineral nutrients and oxygen up from the uninhabited depths to replace the depleted supplies in the more densely populated surface layers and inshore zones. Circulation in the ocean is influenced by a number of factors, but its primary cause is the same as that of the air circulation that makes weather; the heat of the sun, warming some parts of the earth more than others.

If the ocean covered the whole earth to a uniform depth, Doctor Vaughan said, the surface circulation would be from the equator toward the cold poles, with a return circuit of cold water along the bottom, rising to the surface again at the equator. But actual conditions on the real earth modify this behavior of the "ideal ocean" very greatly.

The rotation of the earth deflects the currents from a true north-and-south line. Continental masses, island chains and submarine ridges get in the way, hindering currents or blocking their most natural courses altogether. Prevailing winds blow surface water in one direction or another, and hinder currents flowing against them. Rainfall, whether directly into the ocean or running off the land as rivers, dilutes the water and makes it lighter; evaporation increases the salt concentration and makes it heavier, so that it tends to sink even if warmer. Science News Letter, in the Boston Post Sunday Magazine.

## Why All-Day "Sunsets" in Antarctic Regions

Most of us think of Antarctic "evenings" as unbroken and colorless, but W. C. Haines, of the United States weather bureau, who was meteorologist with the Byrd Antarctic expedition, says that gorgeous colors and queer figures appear in the Antarctic sky. When the sun skirts the horizon before disappearing for the long polar night, there are brilliant "sunsets" lasting all day. The colors most often seen are red, orange, yellow, violet, and green. The Aurora Australis, southern counterpart of the northern lights, makes bands of variegated light running from the horizon up to the zenith. Different kinds of rings are formed by the light particles in the air breaking up the sunlight a moment before it disappears. A circle around the sun or moon, or a crown or a cross within a circle. Sometimes the geometric figures are more complicated and on the rims of the circle are parts of other circles, with streaks of light called sun dogs on each side of the sun. These designs vary, says Mr. Haines, because of the way the crystals of ice in the air are turned to ward the light.

## Why "Line" in Ocean

The United States coast and geodetic survey says the phenomenon of a line in the ocean, on one side of which the water is rough, while on the other it is smooth, is one that is frequently observed at sea. The cause is usually ascribed to currents, although there may be other reasons involved. The edge of the Gulf stream is often marked by a very definite line with an abrupt change in temperature and color of water. If the wind is against the current, the stream will be rough and choppy, while the adjacent water is comparatively smooth. A fine film of oil produces a surface known as a "slick." Along the edge of this "slick" there is often a distinct line.

## Why Tamed Candle Power

Candle power is the illuminating power of a lamp or flame as reckoned in terms of the light of a standard candle. The standard candle of the lighting engineer is one so made as to burn at the rate of 120 grains, or 7 1/2 grams per hour. It is commonly of spermaceti. The unit of illumination is the candle meter, which is the illumination given by such a candle at a distance of one meter (39.37 inches). Great Britain does not normally employ the candle meter, but uses instead the candle foot—the standard candle's illumination at a distance of twelve inches.

## Why No "Perfect Crime"

The "perfect crime" has never been and will not be committed, an authority tells the chiefs of police in New York state. There is no perfect crime, he says, because of the imperfections of criminals themselves. Then, too, if a fellow were smart enough to commit a perfect crime, he would do something else.

## Why Called "Maiden Lane"

Maiden lane in New York city got its name because it once followed the course of a small stream where Dutch girls of pioneer days washed clothes.

# County News

## SOUTH WOODSTOCK

Clifton R. Wilson of Leeds was a caller at the Davis home Sunday. Mr. Wilson was formerly a resident of this place, the owner of Wilsendale. His famous herd of Herefords were annually exhibited at both County and State fairs, always bringing home a grand display of blue ribbons.

Gayden Davis is serving the public with meat and fish, delivering several days each week.

The Andrews boys played in Sherns orchestra to a crowded dance hall at West Sumner Saturday evening. Mr. and Mrs. Gerald Davis and Mrs. Bertha Austin were at Bethel Saturday afternoon where Mrs. Davis consulted Dr. Greenleaf, the eye specialist.

Mr. and Mrs. Wendell Roberts and daughter Flossie Elizabeth of Locke Mills were week end visitors at the childhood home of Mrs. Roberts, at Mr. and Mrs. A. N. Felt's.

Albert Russ is erecting a fence on the north and east boundary lines of the Union School play ground.

Mr. and Mrs. Frank Andrews and Mrs. Minnie Stevens of Trap Corner have been on a week's visit at the home of Mrs. Andrews' daughter, Mrs. Robert Cleves of Portland.

Mrs. Zadia Barrett of West Sumner and Mrs. Angio Robbins of Mechanic Falls are visiting with the Andrews' this week.

Lyonel Etcher and Mrs. Sawyer of Easton spent the week end with his mother at the home of A. M. Andrews.

Mr. and Mrs. Bernal Thurlow of Perkins Valley were recent callers at the Davis home.

An exciting closely contested ball game between Molly Ockets and Reddick's resulted in favor of Molly Ockets.

Guyson G. Davis arrived home Saturday night at midnight, coming across country from Farmington where he is attending Normal School. After spending Sunday at his paternal home he left Sunday evening at nine o'clock, expecting to arrive at Farmington about midnight.

Stanley Andrews came home Saturday night from Orono where he is attending the State University. He spent Sunday with his parents. Late Sunday afternoon he took the train at Brunswick for the return trip to Orono.

## NORTH NORWAY

Scott Pottle met with what might have been rather a serious accident while on his way to his work in the village early Saturday morning. When near H. P. Brown's, Norway Center, his car overturned and was quite badly damaged. Fortunately Mr. Pottle was not seriously injured.

Elmer Hussey and party of three from Rhode Island spent the week end with Mr. Hussey's mother, Mrs. Isabel Hussey.

Quite a large delegation from the two neighborhoods attended the World's Fair at North Waterford, Saturday.

This community was saddened on hearing of the sudden death of Gerry Dunn, eldest son of Mr. and Mrs. Fred Dunn of Northwest Norway. Mr. and Mrs. Dunn have the sympathy of the whole community.

Mr. and Mrs. Fred Swan are receiving congratulations on the birth of a son Thursday morning, Oct. 1st. Mrs. Swan and baby are being cared for by Mrs. Hall of Norway at the home of her parents, Mr. and Mrs. C. D. Morse. Both mother and baby are doing well.

Mr. and Mrs. H. C. Heath and son Cecil, with Fred and Florence Grover of Norway Center, had a most delightful motor trip Sunday, going to Lancaster and Berlin, N. H. They ate picnic dinner at noon and arrived back in Norway at about 4 o'clock. All counted the day well spent.

## Chandler Hill, Bethel

Year Dean went to Mechanic Falls and vicinity Saturday to deliver a load of apples.

Mrs. V. Dean and R. Charles Atwood were at "The Hog" and West Bethel to call on Mr. and Mrs. Wm. Kierstead.

Mr. and Mrs. Joe Oullette of Lewiston called on her mother, Mrs. Nichols, Sunday afternoon.

Mrs. A. C. Dean and Capt. Ed Moulton, P. F. D., of Portland were Sunday guests of Mrs. Kirk and children.

Mr. and Mrs. Wesley Dean were at the old farm Sunday to gather their apples.

Fred Edwards was on the Hill hunting the first of the week.

Frank Brooks was at Dean's mill last week to get a load of lumber. Mrs. Kirk spent Saturday visiting Mrs. Wesley Dean in Hanover, going to Hamford in the evening to attend a movie show.

Mr. and Mrs. Everett Mitchell and Mrs. Jim Swan went over the Hill to take some of his stock out of summer pasture.

## Rowe Hill, Greenwood

Colby Ring went to Casco last Sunday and finished fixing up the Ring family lot there.

Mr. and Mrs. Don Leary and son were callers at Colby Ring's Sunday. Mrs. Ida York returned Sunday from a visit with her brother, George Powers, and wife at Wiscasset.

Mrs. Mabel Dunham, Rowe Hill, Mrs. Lucy Bennett and Mrs. Ruth Dunham of Howe Hill were callers at Newton Bryant's one afternoon recently.

Elton Dunham and family attended the World's Fair Saturday.

Mr. and Mrs. Lamont Brooks gave her mother, Mrs. Hall, a surprise party Monday evening which was a complete surprise to Mrs. Hall. The evening was passed in playing games, ending by gathering around the organ and singing several numbers. Refreshments were served and everyone enjoyed the evening. There were about 25 present, from South Bethel, Woodstock, and the immediate neighborhoods.

## WEST BETHEL

Mrs. H. N. Head has been in Boston for a few days.

Mr. and Mrs. Joseph Maddocks left for their home in New Haven, Conn., Sept. 30th, after spending the summer at Camp Logwood.

Mrs. Estella Goodridge spent Thursday with her sister, Mrs. F. O. Robertson.

Mrs. Harry Kenniston and Mrs. Maud O'Reilly are at work in the mill at Locke Mills.

King MacFarland and son Earl and family of Westbrook were at Goodridge Cottage Saturday.

The Teachers' Convention was held at Norway Tuesday, thus giving the children a recess of two days, Monday and Tuesday.

Mr. and Mrs. Blon Brown of South Paris were in town Saturday.

Eloyce Vashaw was at her aunt's, Mrs. Estella Goodridge's, Friday.

Loton Hutchinson was home over the week end from Saco.

Mr. and Mrs. Orman Bennett of Fryeburg spent the week with Mr. and Mrs. W. C. Bennett.

Mr. and Mrs. Fred Gibson of Portland were in town Sunday.

Mr. and Mrs. Archie Hutchinson have returned from a week's visit with their son, Curtis Hutchinson, and family in Fryeburg.

Sheriff Frothingham of South Paris was in town Monday.

Carmelo Onofrio made his first parachute jump at the West Bethel Airport last Sunday. Dean Cunningham was pilot of the airplane.

Mrs. David Shandler of Gorham, N. H., and son Leon of Chrysalis, Central America, called at Stella Goodridge's Monday.

H. N. Head's store was broken into Sunday night and three rifles and other things taken. Paul Head, who lives over the store, was awakened by the noise and went down stairs. The burglars left by a back door.

Mrs. Herman Bennett of Gorham called on friends in this village Monday.

Mrs. George White of Whitefield, N. H., was at Goodridge Cottage one day last week.

H. N. Head was in Boston Monday. Mr. and Mrs. Joseph Perry and two sons, Lawrence and Robert, were at Stanwood Park Monday.

## Middle Intervale, Bethel

Miss Nellie Chapman returned to her home Tuesday after spending several days with Mrs. Fannie Carter.

Mrs. Sarah Gunther is visiting her sister, Mrs. Mary Capen.

Miss Grace Carter and family spent Sunday at Songo Pond.

Rodney Bartlett had a tumor removed from the base of his brain Tuesday morning. Favorable news has been received from him thus far.

Mrs. Amy Bennett is assisting with the work at the home of Ernest Buck. Bertha Winslow was taken to the Rumford Hospital last Friday night, where she had an operation for appendicitis. Mrs. Winslow is quite ill of heart trouble at this writing.

Mrs. Howard Gunther spent Tuesday with Mrs. Fannie Carter.

## WEST STONEHAM

Mr. and Mrs. Carl Penley, Agnes and Mildred Stanley, all of North Fryeburg, visited at John Adams' over the week end and attended the World's Fair.

Ina Good visited at A. B. Kimball's Sunday and witnessed the parachute jump at West Bethel Sunday evening. Charles Carls helped John D. Grover dig his potatoes one day last week.

Mr. and Mrs. Lester Allen and sons attended the World's Fair at North Waterford both days and evenings.

Mrs. Allen assisted with serving meals. Mr. and Mrs. Cecil Kimball spent Friday night with Mr. and Mrs. Lester Allen at "Slide Inn."

# TWO-MINUTE SERMON

by REV. GEORGE HENRY

Many well-meaning people are asking how righteousness is to be made to triumph over evil. The answer: Line up with the forces of righteousness in the church. We are not to be idle. We are not to allow any instrument to remain idle. We are not to leave ourselves in God's ranks. We are to stand up long enough to be counted at least. We are to be willing to march in the sight of the world and let the inhabitants of Jericho laugh if they must. We are to lift our hearts continually unto God and show our faith. We are to be armed and ready to move when the order comes. If the great evils that afflict the world are ever to be wiped out it will be by a united army under the leadership of Christ. If all who believe in Jesus intellectually had that saving faith that leads to open allegiance to Him the world would soon be won and righteousness would prevail.

## NORTH WOODSTOCK

Mrs. Dan Foster, son David and daughter Elizabeth, visited with Mr. and Mrs. George Abbott and family on Sunday.

Sunday visitors at Francis Cole's were Mr. and Mrs. Mont Cole of Locke Mills, and Mr. and Mrs. Ralph Bacon, son Vance, and Mrs. Mae Swan of West Paris.

Mr. and Mrs. Benjamin Warner and son Junior from South Weymouth, Mass., are staying at the Charles Cole place. Mr. Warner has work at the Diamond Match factory in Dixfield, water-proofing the building. James Knights is working for him.

Mrs. Mabel G. Horslin, daughters Frances and Kathryn, and Miss Eula Emery from Portland visited Miss Susie Walker Saturday afternoon.

Mr. and Mrs. Bernard Mills from New Haven Island visited with Mr. and Mrs. John Hemingway several days last week.

Miss Elizabeth Cole visited her sister, Mrs. Frank Sweetser, one day last week.

Several from this community attended Grand at Bryant Pond on Saturday night.

Miss Susie Walker visited with the Cushman family Saturday night and Sunday.

Several from this community attended Waterford Fair on Saturday.

Everett Cole and Miss Susie Walker attended the Oxford County Teachers' Association at Norway on Tuesday.

Mr. and Mrs. Edgar Davis were at Norway Monday.

Mr. and Mrs. Everett McKay and son Lester, also Mr. McKay's sister attended the dance at North Lovell, Friday night.

Mack Dionne is working on the third class road in this part of the town.

# THE OXFORD COUNTY CITIZEN

PUBLISHED EVERY THURSDAY  
AT BETHEL, MAINE  
CARL L. BROWN, Publisher  
Entered as second class matter, May 7, 1908, at the post office at Bethel, Maine.

Cards of Thanks, 75c. Resolutions of Respect, \$1.00. Reading notices in town items, 10c per line.  
All matter sent in for publication in the Citizen must be signed, although the name of the contributor need not appear in print.

Single copies of the Citizen are on sale at the Citizen office and also by W. E. Bosserman, Bethel; Stanley and Donald Brown, Bethel; Lawrence Perry, West Bethel; Richard Hinkley, Locke Mills; Gordon Chase, Bryant Pond; John King, Hanover.

THURSDAY, OCTOBER 8, 1931.

The Citizen is the recipient of a large Hubbard squash from Rev. D. S. Brooks of Middlebury. The squash was inscribed with the words, "The Oxford County Citizen, Bethel, Maine," early in the season by Mr. Brooks, and the artistic lettering shows up beautifully. Mr. Brooks and family have bought part of the Joseph Holt farm on their hill and are making improvements and improvements on the buildings.

## EAST BETHEL

Mr. and Mrs. Leslie Noyes were in Norway Tuesday to attend the funeral of Mr. Noyes' cousin.

Henry Merrill and Mr. and Mrs. Cass Merrill of Dixfield were Sunday callers at Mr. and Mrs. Al Curtis.

Mr. and Mrs. Jorgen Olson are preparing for the birth of a daughter. Mrs. John Howe was in Norway Tuesday.

Mrs. Evelyn Kimball, Richard and Adele, spent Tuesday with Mr. Guy Bartlett.

Miss Eva Bartlett, who is attending Gorham Normal School, has been chosen to serve on the Oxford County Program Committee for the year.

The boys and girls of the 4-H Club held their exhibition Tuesday evening, showing their year's work.

Bethel Grammar School, Grade V

## ODD THINGS AND NEW—By Lane Bode

## NORTH NEWRY

F. W. Wight and family and Mrs. Abbie Littlehale attended Waterford Fair Saturday.

J. B. Vail was in Auburn Saturday night, returning Sunday. Mrs. Vail did not return but will be able to come in another week. W. D. Kilgore accompanied Mr. Vail to Auburn.

Mr. and Mrs. L. E. Wight had for callers Sunday Mr. and Mrs. F. O. Walker of Rumford, Mr. and Mrs. Roy Bennett, Roger and Ramsey Reynolds, Miss Carrie Wight, Paul Wight, and Mrs. Gertrude Hanson.

Miss Bertha Rogers is at her home for a few days.

Robert Davis shot a bear one day last week. They are doing extensive damage to the apples this year.

Daniel Wight and a friend from Gorham came home for the Freshman Reception.

L. E. Wight attended Grange meeting at Bryant Pond Saturday night.

Miss Catherine Hutchins was an over night guest at W. B. Wight's Wednesday.

Quite a number from North attended Andover Fair last week.

Mr. and Mrs. F. I. French called at L. E. Wight's Monday afternoon on their return from Errol where they had spent the day with their daughter, Mrs. Agnes Sweet.

Hartley Hanson and Harry Clifford are working for Mr. Barnett of Upton.

Miss Cleo Russell, Miss Carrie Wight and Miss Alice Parker enjoyed a picnic supper at the camp site at the foot of Spec Mountain Saturday night.

Robert Bean was drawn to serve on the grand jury at the November term of Court.

Mrs. Abbie Littlehale of Errol spent the week with Mrs. F. W. Wight and family, returning to Errol Sunday.

Mrs. Amy Bennett is employed in the home of Ernest Buck at Bethel.

Mr. and Mrs. William Walker were callers at L. E. Wight's Thursday evening.

Rev. Mr. Irons was a guest of Mr. and Mrs. S. P. Davis Sunday night.

There will be no services at the church here next Sunday.

L. E. Wight will attend the Assessors' Convention at Augusta this week.

## EAST STONHAM

Thaxter Littlefield, substitute carrier, served on the mail route Friday and Saturday, as Carlton Barker, our regular carrier, had a lunch stand at the "World's Fair."

Ree and Mrs. Jason Thurston of Tomworth, N. H., were guests of Miss Littlefield Sunday.

Mr. and Mrs. J. M. Bartlett and son Melvin and Mr. and Mrs. Charles Adams of Hildiston were guests of Mr. and Mrs. Curtis Backford Sunday.

Dr. Hubbard was called to Thaxter Littlefield's Saturday as their baby is quite sick with whooping cough.

Inez Farrington is in very poor health and Elsie Merrill is working for her.

Not many families were left in town Saturday as nearly everyone was at the fair at North Waterford.

Curtis Backford and Charles Chapman are working for Charles Bartlett in Norway.

Judge Jones of Norway was at his camp on the shore of Lake Keewaydin over Sunday.

## Point of Grammar

The word "contents" is plural. If a container holds but one thing, one should say, "The content is." If more than one, "The contents are."—Washington Star.

## NEW BOOKS

Reviewed by HARRY GRACE  
Good books are the treasure friends.

LARRY: *Thoughts of Youth*, 145 pp. \$1.25.

Why, why, why was he cut down before he had really started? I feel a better man for reading this book. Being a father myself I will say this—I hope my boy will be as fine a chap as Larry Foster. The diary and letters of this boy are presented without changes or explanations. It is an open book of the life of this nineteen year old lad at Lafayette College and his impressions, ideals and philosophy during his Freshman and Sophomore years. Reading it one wishes he too were a boy again to enjoy "cherry-stone clams and strawberry shortcake" or to get his outlook on life as on page 27 he says, "A day like this proves to me there is a God." One looks with him into the future as he writes to Girl "Honey, when I see the troop of females who grace our schools I wonder just what the next forty years is going to be like." The class of 1927 presented a window to Lafayette College in memory of Larry. I recommend this book to every youth; to every father and mother.

HALF A LOAF: By Grace Hopper Lewis, 32 pp. \$2.50.

Mrs. Lewis reveals with rare insight the career of a struggling writer and his wife in an obscure town. She portrays the adventures of the two, the wife submitting always to the author's wanderlust for "copy." All is grim that comes to his mind in his insatiable desire for local color. Nothing is sacred. Even her sufferings in the throes of child birth makes material for "another story." With him it is the author first, the lover-husband, second. The book is realistic, romantic and decidedly well written by the former wife of a successful author.

STADIUM: By Francis Wallace, 284 pp. \$2.00.

The author of "Huddle" gives us another story of fighting action on the Gridiron. He adds a touch of romance in the love story of Dan Curtis, the coach with the will to win, and the daughter of Jerome Gehring, the banker who sold the bonds that built the Stadium—a business failure until Curtis makes it a paying proposition. The story is in the nature of an expose of football as a racket. "College Gangsters" one of the players calls themselves, "with the colleges getting the big dough, and the president, Doctor Baker, one of the higher ups."

SKYSCRAPER: By Faith Baldwin, 319 pp. \$2.00.

This book is New York, 1931. Behind the towering mass of concrete and steel, the author of "Queen Wife" and "Today's Virtue" reveals the loss of Lynn Harding for Tom Shepard, both employed in the same bank. Too poor to live on his salary alone, and despite the suave David Dwight, connoisseur of beautiful women, they find a solution to their problem in the pursuit of happiness. The characters in Faith Baldwin's new novel are people we know. She simply makes them a little more intimate.

Why Americans Are Rugged  
If needless noises are detrimental to the health, the American race must be rugged, for it stands a lot of punishment.—Detroit Free Press.

Looks Bad  
What's the use? When the old folks build a fine house, they can't live up to it. And the next generation can't make enough money to keep it up.—Los Angeles Times.

"American novelists roast American life. Hence they are called Pan-Americans," said Gene Tunney whose interest in literature has recently been pronounced genuine by a famous novelist. "If they lived abroad, the uncharitable hounds, they'd find lots more to roast."

"I know an American painter who went to live in a French village. I met him one day in Paris and asked him how he liked French village life. 'Fair,' said he. 'Have you called on any of your neighbors?'"

"No," he said, "but I'm going to if I miss any more of my wood."

Catching It Either Way  
"That fellow Dupleigh has got a scared, sneaking look. Has he been in any position to do any crook work here?" asked the president.

"No," grinned the manager. "I know the answer to his actions. His wife has ordered him to demand more money, and the poor fish knows he's lucky to get what he does."—Cincinnati Enquirer.

VOICE TOO STRONG  
"That weak little fellow we met says he's a ventriloquist and can throw his voice."

"Don't you believe it—his voice is too strong for him to throw."

Auntie's Promotion  
"Please, madam," asked the pretty parlor maid, "may I have Monday off to go to see my aunt?"

Before her mistress could reply, little Peggy, who had certain inside information on the subject, added her pleadings to the maid's.

"Oh, mummy," she said, "do let her. Her aunt's been made a sergeant."—Liverpool Express.

Flashlights  
Shirley and her mother started out about dusk to visit a neighbor, but Shirley kept lagging behind. Finally mother said:

"Hurry, daughter, or we'll never get there."

"Oh, wait a minute, mother, I'm watching those bugs with their flashlights," said Shirley.

Nice Neighbor  
Mrs. Jones—It's Mr. Smith at the door.

Jones—What does he want now? He's got every garden tool I possess.

Mrs. Jones—He wants to borrow you for a bit of digging.—Humorist.

Unbelievable  
Mother-in-law—You worm, you've just broken our best mirror! Don't you know that means seven years of bad luck?

Son-in-law—Oh, my, am I going to live another seven years?—Answers.

HEIGHT OF VANITY  
She—What do you consider the height of vanity?  
He—How tall are you?

Confusing  
"Can you tell me what time the 9:45 train goes?"  
"At a quarter to ten."

"Neither, these time-tables! They are never right."—Fleegende Blaetter (Munich).

A Supposition  
"Mother, do fishes travel in schools?"  
"Yes, son."

"Well, what do they do when the teacher gets caught?"  
"Oh, then they play hooky."

Tramp, Tramp, Tramp  
First Somnambulist—Did you enjoy a good night's sleep last night?  
Second Somnambulist—No, I'm still troubled with that charity horse.

## HANOVER

Mr. and Mrs. Frank Barrows of Gorham, N. H., were weekend guests of their sister, Mrs. Silver.

Frank Worcester and Wallace Saunders were at home from Gorham Normal School over the week end.

Mr. and Mrs. Kenneth Farwell and children of Rumford were at Arthur Howe's Sunday.

Miss Freda Worcester is assisting in the post office.

Mrs. A. T. Power and son Alpha, accompanied by Miss Sears, left for their new home in Tilton, N. H., Thursday.

There will be a special town meeting Friday evening.

Miss Whittier spent the week end at her home in Lewiston.

A. R. Saunders returned Wednesday from a business trip to New York.

Mr. and Mrs. G. C. Barker motored to Boston Monday to carry their daughter Mary to the Catherine Gibbs School, where she will commence her second year's work. Miss Stella Bartlett accompanied them back.

The Ever Ready 4-H Club of Hanover will hold their local contest at the Grange Hall at Newry Saturday evening. There will be a short Grange meeting at 7:30 after which the Club will put on their demonstration and program. Friends are cordially invited to attend.

The bridge member who is absent gets the most slams.

Memory, no less than hope, owes its charm to "the far away."

The month obeys poorly when the heart murmurs.—Voltaire.

Quarrels would not last long if the fault was only on one side.

It means a whole lot to daily happiness to have something to do.

Egotism never seems to inconvenience the man who possesses it.

Awareness that one lacks tact accounts for a great deal of silence.

The man of the hour today is merely one who keeps up to the minute.

Good breeding is mostly what your parents teach you. Don't discredit them.

## MILTON

Mrs. Ada Billings visited her brother, Addison Bryant, Sunday.

Walter Millett has been drawn for the jury for the November term of court.

Mr. and Mrs. Abner Mann of Bryant Pond were Sunday callers at Clarence Jackson's.

Several men from this way are working on the road at East Milton.

Mr. and Mrs. Freeman Morse of South Paris were at their home here Sunday.

Henry Billings and family were callers in town Sunday.

Mr. and Mrs. Charles Smith were callers in town Monday.

Mr. and Mrs. Will Dyer attended the Waterford Fair.

Mrs. J. H. Akeley is having her piazza screened in.

Stops Headache in Five Minutes

A Wonderful Formula Ends Aches and Pains Almost Like Magic. Something Better and Safer? Thousands of men and women are now stopping throbbing, sick, dizzy, splitting headaches, as well as the excruciating pains of rheumatism, neuritis, toothache, etc., with a marvelous new formula that is said to be far superior to anything heretofore used.

It contains no aspirin, acetanilid, etc., and is absolutely safe and harmless. This remarkable formula, called A-VOL, is being prescribed by thousands of doctors, dentists and welfare nurses because of the quick, efficient way it relieves all types of aches and pains without depressing the heart, or causing any other harmful effects. A-VOL quickly stops the most severe pain, leaving the patient refreshed and feeling fine. Especially effective in women's period pains.

\*To quickly prove to yourself that this is truly a remarkable formula, just step into your nearest drug store and get a package of A-VOL for a few cents. Take a couple of tablets right there. If your pain is not gone in five minutes, the clerk will return your money.

CHRISTIAN SCIENCE LECTURE  
Continued from Page One

quoted it must be admitted that mankind is not the author or creator of basic fundamental law. It is our duty to discover basic law and to translate its divine precepts into human forms and expressions so that it can be intelligently applied and thereby insure our inalienable right to enjoy happiness and success.

It is indeed quite imperative to clearly discern the nature of absolute law. And it will prove helpful to understand that there is a clear and a definite distinction between basic law, which expresses God's good government, and human codes, as well as the so-called mortal laws which are supposed to produce human disease, discord, and disaster.

In the consideration of Christian Science as unfolding divine law, intelligence and good judgment demand authoritative information regarding any subject before forming opinions and conclusions. It will be in keeping with the demands of common sense and good taste for us to derive our information from unimpeachable sources where facts supplant opinions and distorted beliefs.

That Mary Baker Eddy is the Discoverer and Founder of Christian Science is now generally accepted and conceded. From childhood she was deeply religious and was an efficient and progressive student of the Bible. Through an earnest study and research of the Scriptures she proved that perfect trust and confidence in God's laws proved that God governs His universe, including man, through infinite intelligence; and that infinite intelligence constitutes and embraces absolute law sets aside and nullifies absolute law is immutable (unchangeable); and that it can be understood and intelligently applied; and when understood, and accordingly applied, absolute law sets aside and nullifies the false beliefs of designated and termed "natural" or "human" law.

During her investigation and research an injury, caused by an accident, led her to apply these absolute, immutable laws to her then apparently helpless condition; and through her understanding and the intelligent application of these laws she was healed. Through this experience she had proved for herself that God's laws are immutable, available, and operative. She discovered that "divine laws of Life, Truth, and Love" (Science and Health, p. 107), and she named this discovery Christian Science.

Mary Baker Eddy was a great woman. Her greatness is supported by three major achievements:

First: After she had passed the meridian line of life, she became the author of a book, "Science and Health with Key to the Scriptures," which challenged the attention of the reading public throughout the world.

Second: In 1879, she organized a church "to commemorate the words and works of our Master, a Mind-healing church, without a creed, to be called the Church of Christ, Scientist, the first such church ever organized" (Retrospection and Introspection, p. 44). At this time this church has approximately twenty-five hundred branch church organizations encircling the globe.

Third: In 1908, she established The Christian Science Monitor, an international daily newspaper, which, from the standpoint of clean journalism, is regarded by many as the standard of perfection in the newspaper world.

These achievements are legitimate authority for our resorting to her writings in determining every controverted issue regarding this Science. In "Science and Health with Key to the Scriptures" (p. 107), she says, "In the year 1866, I discovered the Christian Science or divine laws of Life, Truth, and Love, and named my discovery Christian Science."

Furthermore, in her book, "Fundamental Divine Science" (p. 1), she asks this question, "How would you define Christian Science?" She then answers the question thus: "As the law of God, the law of good, interpreting and demonstrating the divine Principle and rule of universal harmony."

Let me now call attention to this fact. Her declarations and definitions are squarely in line with statements and facts and conclusions so ably set forth in 1765 by the eminent Sir William Blackstone, who wrote his commentaries on the laws of England one hundred years before Mrs. Eddy made her discovery of the "divine laws of Life, Truth, and Love." Their statements and logic agree in substance and in fact. They agree that the basic law is divine—God's law. They further agree that God's divine law is revealed through the Scriptures and must be discovered therein; and they are in exact accord with the fact that divine law is sufficient under all circumstances and conditions to meet the human needs of mankind. The learned Blackstone confined his investigations and writings to the civil laws of men and nations; whereas, Mrs. Eddy, through her writings, has applied divine laws from a spiritual, or meta-

physical, basis, unfolding the divine plan of perfection and harmony in all things.

## THE CHALLENGE

When Christian Science was given to the world by Mrs. Eddy, it at once challenged the attention of two classes of individuals, the material scientists and the clergy.

The material scientists at once took issue with her denial of the reality of matter, for they had discovered her statement in Science and Health (p. 468), "There is no life, truth, intelligence, nor substance in matter." After some discussion of the subject it was dismissed on the ground that there was no science involved in her discovery. But what is the spectacle we now observe? Behold, the material scientists of today declare that separate and apart from states and stages of consciousness there is no matter—a reversal of their position of fifty years ago, and a claim by them to a new discovery. This claim of the materialists did not escape the attention of a shrewd newspaper writer, who very tersely said: "Boys, you haven't made a discovery. Mary Baker Eddy discovered that fact and she told it to the world fifty years ago."

The clergy also objected to Christian Science. Their contention was that it was not Christian in character; and as to its science, the material scientists had passed upon that claim and had found it wanting. What do we observe today? Many of our religious leaders openly acknowledge the practical efficacy of Christian Science and commend its religious teachings. Perhaps no one has contributed more credible testimony in support of Christian Science than one Dr. Lyman P. Powell, of New York City, who is not a Christian Scientist, but who, as a clergyman, an author, a public lecturer, and a former president of Hobart College, gave to the reading public in 1930 a new biography of Mary Baker Eddy. His estimate of Christian Science is briefly stated thus: "Jesus brought the undisturbed and the handicapped good news. The blind receive their sight, and the lame walk, the lepers are cleansed, and the deaf hear, the dead are raised up, and the poor have the gospel preached to them." . . . Rarely have the sick, the sinful, and the dying heard any good news. Christian Scientists could bring which Jesus brought of a heavenly Father who cares for every one of us. . . . Christian Science proclaims itself a bearer of the same good news. Christian Scientists could not keep it to themselves if they would and would not if they could, for many of them have experienced in their own persons transformations similar to those of apostolic experience.

There is a challenge here which Christian Science offers to the world, and no longer can it be evaded.

TRANSFORMATION AND HEALING  
The healing of human ills through Christian Science furnishes the most convincing proof that the power of the same divine Mind which was fully demonstrated by Christ Jesus has not lessened or abated in the least and is available here and now.

No thinking person will assume that Christian Scientists fail to recognize the commands or precepts of Jesus, or that the teachings of Mrs. Eddy supersede in the slightest degree his teachings or doctrines. I submit the following section from the Manual of The Mother Church (p. 17) to show that Mrs. Eddy had no such intention. The section is as follows: "At a meeting of the Christian Scientist Association, April 19, 1879, on motion of Mrs. Eddy, it was voted,—To organize a church designed to commemorate the word and works of our Master, which should restate primitive Christianity and its lost element of healing."

Every person before becoming a member of any Christian Science church or society must subscribe to six religious tenets. The basis of the Christian Science faith is summed up on the last, or sixth, tenet, as follows: "And we solemnly promise to watch and pray for that Mind to be in us which was also in Christ Jesus; to be unto others as we would have them do unto us; and to be merciful, just and pure." (Science and Health, p. 497).

Christian Scientists are striving to express the Christ-spirit at all times. They are striving to emulate the healing works of Jesus. They are striving to get the same vision of the Christ that saved the human Jesus in the dark hours of his earthly career from the belief of death and the grave. They are confidently expecting in the fullness of time to be forwarded by having that wonderful vision expressed by Paul, "Till we all come in the unity of the faith, and of the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fullness of Christ."

The realties and beauties of creation are continually unfolding to the Christian Scientist. The real man of God's creation, expressing His goodness, is a fact—a reality. How many calendar years may elapse before mankind generally will appreciate and accept the fact that man partakes of the essence of God's goodness here and

now cannot be definitely ascertained. One by one mortals catch glimpses of the unfolding of divine Principle, and they become conscious of God's law and order operating here, now, and everywhere.

## THE CREATOR—HIS CREATION

In endeavoring to discover and to apply the law of man's being, there must be an appreciation of God in His true sense, and of man as His reflection. To this end Christian Science teaches a clear distinction between a mortal or material sense of God and His true nature.

In the Christian Science textbook (p. 465) God is defined thus: "God is incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love." Hence, there must be an appreciation of the fact that creation, as God's idea, is continually appearing, before Christian Science can be thoroughly understood as the immutable, divine law of God. When so apprehended, perfection and harmony will be observed as inseparably interwoven in every part thereof.

The Scriptural account of creation, as recorded in the first chapter of Genesis, reveals a spiritual unfolding, and closes with the sign and significant statement, "And God saw every thing that he had made, and, behold, it was very good." Herein the basic truth is stated clearly and distinctly: that God made all, and made it very good. Since He made everything "very good," so it follows that "good" is the essence of every creative act, because God is good; hence, that which is not good was not created. This vision of God's creation will appear to the earnest thinker, and it will dispel the fear and mystification due to a material sense of things. In the fulness of time St. John's statement will become fully apparent, "All things were made by him; and without him was not any thing made that was made."

The glorious spiritual facts of creation are provable to the sincere and earnest follower of Christian Science.

THE MODUS  
A few observations may serve as helpful waymarks to indicate the modus in the right direction.

God's completeness must be assumed and acknowledged as the standard of perfection at all times. He must be understood as divine Mind, or Spirit, and must be regarded as the source of all that really exists. This recognition of God will liberate and will enlarge the individual's capacity to understand and express infinite Mind. The individual is thinking rightly to the extent that he holds his thoughts in line with the divine order. This right mental action is affirmative proof that the spiritual man is unfolding as the image of good in his consciousness.

I suspect that from the earlier dawn of time all mortals have been concerned and confused regarding the advent of sin and disease in the experiences of mankind. By applying the Scriptural account in Genesis to this state of mind, the confusion should be dispelled. For we certainly will all agree that sin and disease are not states or stages of good; and not being "good," were never created. But how are they to be accounted for? The wisdom of Solomon has given us a rational key to the solution. Speaking of mortal man he said, "As he thinketh in his heart, so is he."

There is an accepted rule, that like produces like. Now Solomon's statement will justify the conclusion that, in the absence of restraining influences, sinful thoughts will result in overt sinful acts. His saying also established the fact that the material body of the man is not the offender; the culprit. The body is only the convenient avenue or channel for expressing the behests of the sinful and depraved mind. Mortal mind is always the offender that deserves punishment. A significant fact worthy of note at this time is, that our course of justice must not punishment be inflicted only after the deed has been committed, but that a defendant must first be found a well-defined threat to do wrong and has thereafter acted upon that intention.

## AN ILLUSTRATION

An illustration at this point will help to fix the facts of the situation. Let the material body of a man, merely the avenue or channel, and not the culprit.

An efficient young boy, a page in a banking institution, was left in charge of a large sum of money. A cunning, crafty man, who was near him, and that the avenues of escape were favorably open, he advanced to the center of the cage, put forth his hand, and was in the act of taking a package of bank bills, when in a firm and decisive voice he affirmed, "I am not a thief." There was no action of protest from his body, and without delay his hand was withdrawn, and his arm assumed its normal position. That circumstance affords convincing proof that the mental action holds absolute control over the body. You may ask, Was this young boy a Christian Scientist? No. He had never heard of Christian Science. He did, however, hear "a still small voice" which told

him he was honest. Furthermore, in the face of that temptation he was prompted to put into operation a well-known Christian Science practice. He denied and reversed the error (temptation), and affirmed and applied the truth (that he was not a thief). Will it be assumed by any thinking person that when tempted to become what he was not, divine law did not intervene? The divine law of ever present good was operating then and there, and it healed that young boy instantly from the dreadful disease of believing he could be a thief. This instance serves to establish the fact that the basic nature of man is good.

## UNWHOLESOME INFLUENCES

The same application of Christian Science will assure freedom and liberty to the one who is sick as well as to one who is in prison. In fact, the individual who is sick is imprisoned and held by sick beliefs, and needs to be liberated. Sickness and disease are manifestations of sick or diseased thinking on the part of someone. Of course, we do not want to be understood as saying that the sick one has deliberately been guilty of unwholesome thoughts. He may have been off his guard and may have been agreeing to the erroneous predictions and conclusions of others, thereby becoming an innocent victim of wrong thinking.

A great mistake is made by assuming that thinking has little or nothing to do with producing results. The opposite is the truth. When human thought is sustained by right motives and guided into spiritual lines of thinking, thus reflecting divine Mind, Spirit, harmony is the inevitable result. Spiritual thinking is evidenced in better general conditions, and improved health and happiness are sure results.

It is gratifying to note that since the advent of Christian Science as an organized religious movement there is coming to the front a greater recognition of real values and a more persistent demand for right thinking. It is encouraging when such men as Dr. Stewart Paton, M. D., of New York City, will even hint at the value of right thinking in combating disease.

I submit a paragraph from a lecture, as reported, delivered by him in Princeton University. He said: "The campaign to find out more about our minds and to apply the knowledge so already have is the only rational basis from which the fight against physical disease can be conducted successfully. The fight against physical disease would have been far more effective had the members of the medical profession devoted more time and attention to the cultivation of the art of forming good mental habits and of serving the essentials of clear thinking. Peace, prosperity and the progress of civilization are literally waiting for the physician to recognize and only that the sound body is a result of a

for the sound mind, but that to know and understand the organization of mind is the first step toward the securing of a really sound body." (Reported Harper's Magazine, January, 1924, p. 165).

I am sure all will agree that these sentiments are noble and inspiring and are evidence that divine law and order is unfolding in human consciousness. Another tangible evidence of this unfolding is found in the fact that war has been outlawed and abolished among nations through legal procedure, and peace, prosperity, and progress of civilization enhanced thereby, through right thinking. This process is the evidence that the "law of God, the law of good," is operating continually and drawing humanity up to the higher levels of thought and action.

As it is essential to understand the nature of God, so it is an imperative necessity to understand the spiritual nature of man, as distinguished from the material structure of the body. A simple illustration may serve the purpose of fixing the fact that the body is merely the servant of the conscious, mental individual, and does his bidding.

## AMPLIFICATION

I am the owner of a fountain pen. To distinguish that pen from others of like nature and kind, it has inscribed thereon my name and address. In my possession, and directed by my normal action of thought, it will express me. It will subscribe my signature in a natural and in a normal manner. However, when my thinking becomes agitated and disturbed, the pen at once reflects and expresses the disturbance. Furthermore, the same pen in the hands of one who is controlled by erroneous thinking will express the thoughts of the forger. The name and address of its owner is not a guarantee of its action. It is the nature and quality of the thinking back of the fountain pen that determines the record it produces.

In this amplification the human body may be likened to an efficient fountain pen. As thinking has inscribed a name and address on the pen, so through a long series of mental processes, certain individualities are objectified on the body. The pen made a record of a thinking thought, so the body is continually making a record of the thinking of the individual. The fountain pen is to use, but it is not I. Your body is yours, and yours to use. It is not you. The "you" is the spiritual man, outside of the body form; and capable at all times of reflecting that body so as to produce a harmonious record.

## CONCLUSION

The facts, the logic, and the progress advanced may be summarized as follows. Some may ask, "What is the purpose of this recognition and only that the sound body is a result of a

is no room for doubt or argument. The fact remains as stated. Through the process of right thinking, hundreds, thousands, and hundreds of thousands of reputable people from every country of the civilized world are gladly testifying to the healing of the body through the transformation and regeneration as taught and applied in Christian Science.

The real purpose of this lecture is to emphasize the fact that God is; and that man lives and has his being through the intelligent operation of law and order. In proportion as every individual habitually struggles to know and to understand God and to be obedient to His laws, that struggle and that obedience will bring into human experience the highest degree of human liberty. It will heal the sick and will reform the sinner. It will promote a full understanding of man's "unalienable right" and enable everyone who will follow obediently to enjoy the highest degree of life, liberty and the pursuit of happiness. It will bring into human consciousness, as a vital living reality, man's immortality so profoundly expressed in the following poem entitled "The Last Judgment":

When the vast sun shall veil its golden light;  
Deep in the gloom of everlasting night;  
When wild destructive flames shall wrap the skies;  
When ruin triumph and when matter dies,  
Man shall alone the wreck of worlds survive.  
Mid falling spheres immortal man shall live.  
Anonymous.

## SUNDAY RIVER

Richard Douglass and son Edwin of Bridgton were up to his mill Saturday and Sunday as he took part of it away.

Guy Caldwell of Mexico, N. H., was in town Sunday.

Mr. and Mrs. George W. Foster of New Hampshire were in town at Glenn Swan's Sunday.

Mr. and Mrs. J. W. Reynolds of C. B. Foster and Annie Foster left on an auto trip last Friday and returned to the village Sunday and Monday. They visited Glen Swan's. It was a lovely day and the scenery was beautiful.

Mr. and Mrs. Charles Staphors of Rumford spent the week end at C. B. Foster's. Sunday they went to the village of Weld to the Ramoths. Returning by Farmington, a distance of over 200 miles.

Mr. and Mrs. J. W. Reynolds took a trip to Brail, through the White Mountains, Berlin and Gorham, recently. They visited friends and relatives.

Mrs. Jack Kase, son Carl, Mrs. Vivian Barlow and son, and Lela Dol Bureau of Haverhill were visitors in town last week.

Mr. and Mrs. Merle Rand and Elizabeth Helen of Harrison were visitors at Mr. and Mrs. Charles Heine's Sunday.

Mr. and Mrs. Harold Bennett, Mrs. C. O. Demeritt and Miss Louise Demeritt were in Ketchikan Sunday.

C. O. Demeritt and Bert Fuller are working at the Demeritt place cutting wood.

Allan Walker and Frank Spence are working for Chester Lebl, digging potatoes.

Mr. and Mrs. Charles Heine were visitors in Harrison Sunday.

## WEST PARIS

Mrs. Irvin L. Bowler of West Paris was the guest Monday at the home of her uncle, H. R. Thell, and family.

Mr. and Mrs. P. P. Knight, Jr., returned to Portland, N. H., last Sunday. They were interested in the Mounting Sunday.

Off to Paris to move his family from Mrs. Clara Dunham's home at Church Street to the Allen home at Trip Center.

Half Sunday was observed at the Universal Church Sunday. A very fine program was given in the primary department Sunday under the direction of the Superintendent, Mrs. Lynell Farr, and assistant, Mrs. Harry Chapman, to which an invitation was extended to the Church and Senior Sunday School. The program follows:

Good Morning, Little Friend  
Song, Jesus Wants Me for a Sunbeam  
Welcome, Arthur Briggs  
Catching Things, Junior Farr  
Song, Praise Him, Praise Him  
Prayer by Children, followed by Prayer by Miss Farr.

A Junior Welcome, Five Boys  
I'll Try, Five Girls  
Offering Song and Offering  
Exercises, William Holgers  
Questions and Answers  
Song, Little Lambie Be White and Fair  
March to Church  
Memory Verses  
Song, Jesus Loves Me

Howe Hill—Greenwood

Several from this place were in West Paris Sunday to see Carmen Underhill and his first parachute jump.

Robert Adams, Jesse and Carroll Adams have been digging potatoes for Albert Swan.

Mr. and Mrs. Wendell Roberts and Everett Cross attended Franklin Grange at Bryant Pond Saturday evening.

Roger Hanson, Helen Cross, Wilford and Stanton Cole were in East Bethel Thursday evening.

Albert Swan and family were in Lewiston Saturday.

Mr. and Mrs. Robert Cole visited Mr. and Mrs. Gerald Robinson Sunday.

Redney Cross has been plowing for Robert Cole.

Ray Hanson and Wilfred Bryant were callers at Robert Cole's Tuesday.

Hazel Hanson spent Tuesday night with her sister, Mrs. Robert Cole.

Mr. and Mrs. W. C. Cross, Edith Cross and Mrs. Robert Cole attended the first contest of the "What We Can Do" Club Monday evening.

It is said that a returned home from Mrs. and Mrs. Howard Robinson.

Funeral services for the late Mrs. Thomas Green at Bryant Pond Tuesday.

## BRYANT POND

Franklin Grange held its regular meeting last Saturday night with every officer present. Norway Grange accepted the invitation and there were over 30 present. They brought two candidates and the third and fourth degrees were conferred on a class of ten. There were about 225 present including visitors from several Granges. A baked bean supper was served at 7 o'clock.

The Parent Teacher Association met last Thursday evening. The meeting was called to order by the Vice-President, after listening to the reports of the committees the following program was carried out:

Piano solo, encore, Floyd Redman Reading, Lester Fell Song, encore, Girls' Glee Club Refreshments were served.

The Freshman reception was held at the high school building last Friday night with a large attendance.

Mr. and Mrs. H. Alton Bacon and Mr. and Mrs. Ned L. Swan spent the week end at Mr. Bacon's camp at Harpswell.

Mr. and Mrs. Robert Cushman of Auburn were the guests of his mother, Mrs. Florence Cushman, Sunday.

Mr. and Mrs. Leslie Abbott, Elsie Abbott, Miss Muna Thompson, Mr. and Mrs. Fred Cole, Mr. and Mrs. Robert Cushman and Florence Cushman went to Gratton for the day Sunday.

Clyde Brooks of Portland is at home for two weeks vacation.

Lee Rowe spent a few days in Boston last week.

Quite a delegation from Franklin Grange attended Pomona at Watford last Tuesday.

There was no school last Tuesday and the teachers all attended convention at Norway.

The Farm Bureau will hold a meeting on Child Training Tuesday, Oct. 13, at 1:30 P. M. They want all mothers to be present.

The local contest of the 4-H Club will be held in the Grange Hall Tuesday evening Oct. 13.

## SOUTH ALBANY

Mr. and Mrs. Colby Robinson were dinner guests at James Russell's. Callers in the afternoon were Mr. and Mrs. Stephen Cummings and Frank Beck from Norway.

Harvel Allen is spending his time with his brother, Howard Allen.

Hugh Little's sister, from Portland visited him on Sunday.

Nearly everyone in this locality attended the "World's Fair" which was a success in every way.

Lucie Kimball and F. J. Scribner returned to Norway High School Monday.

Mr. and Mrs. Fred Kimball were guests of Mr. and Mrs. Lester Allen at "Slide Inn" through the Fair.

The church services at Albany Sunday were conducted by Rev. A. C. Townsend.

## NORTH LOVELL

Mr. and Mrs. Orris LeBlanc, Fred Mason, Mrs. Daisy Chamberlain and son Burton visited the 200 at Farmington last Sunday.

John McCreave has moved his stock back to Lovell for the winter.

Hester McKen was home from Gorham Normal School over the week end.

Mrs. Audrey Andrews, Mrs. Nettie McAllister and Mrs. Anna McKen have all been under the doctor's care the past week. All are gaining now.

Mrs. Eva LeBlanc and Daisy Chamberlain are to entertain the Circle this week.

Wilbert Harriman left Tuesday morning for Portland where he is to receive surgical treatment. His many friends are wishing that he may return much improved in health.

The church services are now being held in the evening instead of the morning as they have been through the summer.

Many from here attended the Fair at North Waterford and many more are attending Fryeburg fair which is being held this week.

Ivan Kimball of Albany was a caller at John McCreave's Monday evening. Forest Churchill was at the same place Sunday evening.

Mr. and Mrs. Leland Wilson are soon to move to Center Lovell to spend the winter with Mr. Wilson's mother.

Fred Warren from East Stoneham is staying at Leland Wilson's.

Reynard Hatters has been visiting Fred and John Mason with their horse-riding.

## WHY

## Village Was Glad to Lose State Highway

An Arkansas village which has seen better days is now rendering thanks and looking forward in the hope for better days again. And, curiously enough, its renewed hopes are based upon the fact that the straightening of a state highway has taken from the one street of the village the highway it once prized so highly, and left the village several miles removed from the highway of which the village has been a modest mark.

There is a measure of relief and some rejoicing among the people of the village aforesaid. For the people found that instead of increasing local trade and enlarging the village's commercial strength and population, the paved road tended to reduce the trade formerly enjoyed and lead part of the population elsewhere. The wide open road was a wide open invitation to prospective purchasers to drive elsewhere to supply their needs. Now the people greet with satisfaction the return of that isolation which was the source of much of their prosperity in the days before the highway came. This is another side of the paved highway picture, and it might be considered by the smaller towns which fight so manfully to have a state highway routed along their single street.—Daily Oklahoman.

## Why Pine Trees Retain Greenness in Winter

Pine trees and other coniferous evergreens retain their color throughout the winter because the needles or leaves are protected against low temperatures. Scientists explain that in the development of plant life through evolution these trees survived by adapting themselves to withstand the adverse growing conditions of their environment. Leaves are green because the predominant pigment in them is chlorophyll, the substance which enables plants to manufacture food from water and oxygen.

The foliage of ordinary deciduous trees is not adapted to withstand low temperatures and in the fall the chlorophyll is converted into a colorless product. This exposes other pigments, particularly carotin and xanthophyll, and the result is the beautifully colored foliage characteristic of that season.

The needles of the pine trees correspond in function to the leaves of deciduous trees, and the green element in them is protected from injury both by their tough exteriors and by the arrangement of the water molecules in the protoplasm of the cells.—Magazine Section of the Philadelphia Sunday Record.

## Why Coin Is "Cent"

The legal designation of the small copper coin is cent. But "penny" has been applied to the American cent since the beginning of our coinage system, from the English penny which circulated so freely in this country until after the Revolution. The word "cent" as an official name of a national coin first appeared in an act of congress passed August 8, 1793, which prescribed "cents: The highest copper piece, of which 100 shall be equal to the dollar." The law renaming the English penny from circulation in the United States was passed by congress October 16, of the same year, but the name "penny" was transferred to our cent in popular usage and has clung to it ever since.

## CHATTERINGS

Easy street is mostly where old people live.

Doesn't Cupid ever tire of the monotony of it?

Charity should begin at home—and good manners.

Christianity is never a failure to those who practice it.

No day is worthless if it brings a thought that is useful.

Some trouble is best met by being allowed to stew along.

How seldom do letters to the newspapers about "Floopy!"

Sometimes one can cheerfully worry if he can tell somebody about it.

Many willingly admit their faults and make no effort to correct them.

Love is blind, but sooner or later recovers its sight. Prepare for that.

If a man's mistakes don't injure you too severely, you say, "he means well."

Government is a lot of trouble. That is why a lot of people don't attend to theirs.

A flea story, like a snake story, is sure to stir up some one who knows a more amazing one.

You'd think that song, "Happy Days Are Here Again," would never die. It has such a cheering lilt.

Living in an environment ten miles away from where you did in your youth would have changed your whole life.

If your castle in the air is a pleasant little shack on a hilltop in the woods surrounded by five acres of land, you can realize it.

Looked Like Circus Stunt

At Montevideo, Calif., John Ostroch, police captain and motorcycle officer, gave town people a few unexpected moments when he rode down the main street with a five-foot snake coiled around his neck. Ostroch explained that he had been called by a woman to come quickly and protect her from a big snake. He found the snake was harmless and conveyed it in the easiest manner to the hills and released it.

## Why Known as "American"

By long established usage the word "American" is popularly understood to mean one who is a citizen of the United States of America. Technically, of course, the word applies to all inhabitants of the western hemisphere or of North Central and South America.

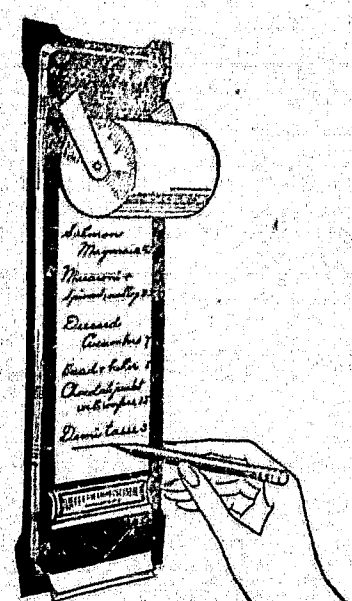

## Why Copper Needs No Paint

Copper cannot rust. It does not need the protection afforded by paint. On exposure copper assumes a light green color which serves not only as a protection to the metallic copper, but is fine appearing.

## Why "Wolverine" State

Michigan is called the "Wolverine" state on account of the prevalence of those animals in that region in the early days of its settlement.

## A \$1 Dinner for 4

of others, equally as good—and think of the good times you can have on the dollars you will have saved!

**MENU**  
Salmon Mayonnaise 12¢  
Macaroni and Spinach 25¢  
Dressed Cucumbers 1¢  
Chocolate Junket with Wafers 15¢  
Demi-Tasse 3¢

Salmon Mayonnaise: Chill one tall can of salmon in the can for several hours, or over-night. Remove from the can, sliding out carefully on a platter. Cover with one-half cup mayonnaise and garnish with eight pickles cut in tiny fan-shaped pieces.

Macaroni and Spinach Scallops: Boil one-third package of macaroni in salted water, and drain. Put alternate layers of macaroni, spinach from a 10-ounce can (or use fresh spinach), and one-third cup of white sauce in a buttered baking dish and cover with one-fourth cup of buttered crumbs. Bake for twelve to fifteen minutes in a moderate oven—375 degrees.

Chocolate Junket with Wafers: Make junket in the usual way with chocolate junket powder, and just before serving whip one-half cup of cream (or use canned whipping cream). Beat the white of one egg until stiff adding gradually one tablespoon of powdered sugar. Serve in sherbet cups with dairy wafers standing upright in the sides of the cup. Top with a cherry if desired.

**DOWN—down—down** go food prices. And down on our reminder pad should go some good dollar dinners. There was a time when it was difficult, indeed, to plan a real good dinner that could be served to four persons for a dollar—but now it's easy.

We recommend the one we have jotted down on our pad here, because it is dietetic as well as delicious. But you can think of lots

of others, equally as good—and think of the good times you can have on the dollars you will have saved!

## Indiana Town Has a Marrying Trust

Here's one of the five marriage squares of Jeffersonville, Ind., looking for business outside the "marriage parlor" where he and four other experts in tying the knot have formed a trust to combat the current depression. They have been able to boost the price of a marriage from \$2.50 to \$5. In addition to reducing the extent of their labor from 24-hour duty a day to two days a week. The trust's business is estimated at \$25,000. The "parlor" is situated at the Indiana approach to the new \$5,000,000 Louisville municipal bridge across the Ohio river.

## POTPOURRI

## Philosophy

Philosophy is called the mother of the sciences, the term meaning literally "love of wisdom." The early Greeks considered philosophy as general culture embracing all knowledge with the broadening of science research, however, it was necessary to classify the branches, such as physics, metaphysics, logic, psychology, etc. Thales a Greek was the earliest philosopher of record. ## HOW

**CHARACTER IS SHOWN BY COLOR-MATCHING TEST.**—Color sense, the ability to match various tints of colors, has been found to have a definite relation to character, since it indicates mental balance. Dr. William S. Wadsworth, coroner's physician of Philadelphia, has evolved a color test to gauge a man's mental makeup and show whether or not he is capable of certain acts. From the results of such tests, he claims, it is possible to determine whether an individual is mentally well-ordered, whether he is whimsical and, aside from showing possible criminal tendencies, demonstrate also if he is fit to be put in a position of trust upon which the lives and safety of others may depend. The equipment consists of a blackboard on which are pasted ten colored slips of paper with a small box back of each slip. The person taking the test is handed a package of 100 slips of tinted paper and asked to place in the receptacle the tints most nearly matching the sample in front of each. After the test the papers are posted on a large chart, each near the sample with which the person associated it. Provided the individual is not color-blind, he would be classified as whimsical, unstable and unreliable if he placed orange tints near greens and blues near yellows. The combinations may reveal a hysterical streak in another individual, and from the method he uses in sorting the colors, his mode of life can be determined to some extent. Some artists and painters taking the tests have shown a queer color sense, and one artist who works in blacks and whites was found to be color-blind. —Popular Mechanics Magazine.

## How System of Finger Printing Proves Worth

The finger-print system and the Bertillon system are not the same. The Bertillon system was developed by Louis Bertillon in Paris in 1850. It comprised the classified measurement of the body, such as the head, left foot, fingers, height, width of arms outstretched. The finger-print system was first used by Sir William Herschell in India in 1857 and superseded the Bertillon system in Britain in 1901. It is now the chief method of identification in Anglo-Saxon countries and in seven other nations as well. In action it has frequently been deemed possible to make a rubber glove with finger prints on it, imitating real prints, but to do it practically would be exceedingly difficult. So far as is known, no two people, no matter what other physical resemblances and in seven other nations as well. In action it has frequently been deemed possible to make a rubber glove with finger prints on it, imitating real prints, but to do it practically would be exceedingly difficult. So far as is known, no two people, no matter what other physical resemblances, have been found to have exactly the same finger prints. Finger print patterns never change from birth to old age, though their regularity may be altered by a scar.

## How "Static" Works

Static is audio-frequency group oscillation discharge between clouds, or clouds and earth. It travels in all directions from disturbance. Static probably impresses its varying frequencies upon the electric waves carrying broadcast signals while they are proceeding from transmitting to receiving stations, something like the mix-up of waves that would occur if one were to throw a large rock into a lake upon the surface of which there were previously moderate waves. The latter would be broken up and changed in shape, but their frequency would probably continue the same as before. Static waves will penetrate any substance that radio waves can penetrate.

## How Tree's History Is Told

Virtually the entire life history of a tree can be extracted from it by the scientific forester with an increment borer, a tool which removes a plug, or cross section, from the trunk. The boring, when removed and closely examined, shows all the vicissitudes that a tree has encountered, its age and its yearly history. The growth can be measured and progress charted in terms of annual rings in the wood. These borings even show something of soil and climatic conditions, as well as of fire and the fight between trees of different species for existence. —Popular Mechanics Magazine.

## How Rolled Oats Are Made

In making rolled oats the oats are first cleaned and graded as to size, eliminating small and extra large oats. They are then put into a large vat and heated by steam pipes very hot and dry. The oats are then passed through oat clippers, which clip both ends, leaving only the central part. Since the oats are dry, the clippers remove the hulls as well as the ends of the grain. The rest is then flattened and screened, leaving cleaned oat groats. These are steamed until softened and then passed through hot rollers.

## How to Clean Bronzes

Bronze articles may be cleaned by the use of a paste made of powdered chalk and water, which is spread over the bronze and rubbed well over the surface by means of a stiff brush and then allowed to dry. After drying, rinse off the powder with running water and dry in the sun. Wiping off with an oiled rag will improve the looks of modern bronzes.

## HERE AND THERE IN MAINE

A large and attractive cottage is being built for Rudy Vallee on the shore of Kezar Lake, Lovell. The tract of land comprises nearly 400 acres, and adjoins the summer home of Don Dickerman.

Camp Ha-Wa-Ya, a boys' camp on the shore of Crystal Lake in Harrison, was broken into and ransacked recently. It is not definitely known how many articles were taken. Officers are investigating the offence.

Irving Thurlow of South Paris succeeded in raising a bushel of sweet potatoes this year. He purchased the plants.

According to statistics Maine was furnishing more employment on state highway construction on July 1st than any other state in the Union.

Among the many bequests in the will of Norman Leslie Bassett, former associate justice of the Maine Supreme Court who died recently, is \$10,000 to Colby College.

Phyllis Goding, a 4-H Club girl of North Livermore, has a fine record this year. She has canned 1,114 pints of about 10 different varieties. Most of the products were from the home garden. The expense was very little, amounting to \$15.12.

The body of Thomas Walker was found in the Androscoggin River at North Turner Tuesday. Mr. Walker had been missing since Aug. 2. The cause of death was given as suicide. Oxford County Teachers Convention met at Norway on Tuesday. A fine program was enjoyed by about 300.
